

Reiki

Universal Life Force Energy

Reiki (pronounced *RAY-key*) comes from the Japanese words *rei* (spirit), and *ki* (energy). It is usually translated as 'universal life force energy.' Reiki is also a Japanese holistic energy healing system that is gentle and noninvasive, yet yields powerful results for the body, mind and spirit.

Reiki works when a practitioner sets an intention to facilitate the healing process of a client and allows Reiki to flow in whatever amount a client needs and for whatever it is needed most. It is ideal for use with animals, since its effectiveness is not dependent upon physical contact.

The animal controls the treatment, accepting Reiki in whatever way is most comfortable, either hands-on or from a distance, or a combination of the two.

Reiki is ideal for use with animals because it doesn't cause stress, discomfort or pain, all while generating remarkable results. Animals respond intuitively to Reiki's power to heal emotional, behavioral and physical illnesses and injuries.

For animals who are healthy, Reiki helps to maintain their health, enhances relaxation and provides a sense of peace and contentment. For animals who are ill, Reiki is a wonderful healing method as well as a safe complement to all other forms of healing. For example, Reiki can reduce the side effects of chemotherapy, support an acupuncture treatment or enhance the effects of flower essences. For animals who are dying, Reiki can provide comfort, relief from pain, fear and anxiety, and ease their transition into the afterlife.

Reiki can benefit people, objects and situations, as well — the possibilities are limitless.
